WHAT'S NEW MY23

3/21/22

- A completely new dash design configuration, integrated with the best infotainment and HVAC system, the 2023 Aspire now has the most advanced technology combined with an incredible intuitive user interface giving the coach owner a tremendous driving experience. The Aspire will be equipped with a 15" digital dash screen, and the steering wheel is now a 3-pod system enhancing driver's interface with all the cockpit controls. This three-pod steering wheel system encompasses buttons for screen view selections, graphical instrument cluster (G.I.C.) menu navigation, and media source selection. This eliminates the rotary joystick VDC controller. The infotainment system is from Valid Manufacturing, which is also the supplier of the 15" digital dash. Finite details will be released at the Entegra Coach Homecoming rally in May.
- Automatic headlights with photoelectric sensors have been added for driver convenience and safety.
- Rain-sensing windshield wipers detect moisture on the windshield and activate automatically to help increase driver visibility. Once the system is turned on, there is no need for the driver to activate, deactivate or adjust wiper speed under normal driving conditions.
- Upgraded to X Coach Z 295/80R22.5 tires with two additional grooves to evacuate water to help improve wet road grip.
- New Valor Gen III TPMS system is completely wireless. Now with substantial battery life of 5+ years and a stronger signal for more accurate, real-time communications between sensors, antenna and dash.
- Changed the throttle and brake pedal supplier to Williams Controls. Founded in 1937, they were the first to design the electronic throttle control in 1987.
- The compression engine brake now has three configurations; low braking 210 HP max, medium braking 289 HP max and high braking 352 HP max
- Enhanced the modular cooling package which is now easier to service the cores and the core mounting is integrated with the fan shroud.
- All-in-one automotive antenna for AM/FM/Sirius/GPS dash radio system
- Added RV-C control to Equalizer hydraulic leveling system, which now enables the feature to be on Vegatouch LED touchscreen or on your phone application.
- The new hitch configuration will improve ground departure angle and reduce stress loads in the hitch by eliminating the cuts, gussets, and welds in the current hitch assembly. The new configuration will also improve routing of the harness to the trailer connector and air line for the Safe Haul system. The hitch receiver tube will set 3/4" higher than the 2022 Aspire hitch receiver.

- New HVAC dual zone system from Bergstrom allows for independent control of the temperature and airflow between passenger and driver. Some of the many reasons the performance of this Bergstrom system is far superior because we are using:
 - A. A rotational molded ducting, replacing the 2.5 diameter flex hose.
 - B. Dual condenser fans are rated at 12KW, 1500 cfm versus the single zone 7.9KW, 800 cfm.
 - C. Four actuators to control the modes versus just two on single zone.
 - D. Heater core is aluminum fin, copper tube construction which allows for better heat transfer.
 - E. Bergstrom's case and door are sheet metal construction versus plastic.
 - F. This system will now include a controller center touchscreen on center console along with fixed control knobs mounted directly below the center stack screen.
 - G. The passenger side console also has a 4.2" LED control screen to control desired dual zone temperature and fan speed operation.
- Engineered a one-touch manual mode to tag dump.
- Change multiplex load centers to new Spyder M1 switches. These are much more reliable.
- The large dual-head exterior mirrors will now feature a two position memory settings complemented by the all-new four high definition Ramco 360 camera system. This high resolution camera view can be viewed on the 15" digital dash or the 15" portrait center screen.
- A sturdy metal macerator door replaces the plastic door, another quality enhancement for 2023.
- Two woodgrain porcelain floor tiles
 - Tacoma Shadow matches the Stonewall and Linen cabinets
 - Harvest Wheat complements the Almond and Auburn cabinets
- Crown Compass customized living room furniture combines the finest furniture craftsmanship with premium Gruppo Mastrotto Italian leather. The padding is high-resiliency foam stitched with leather-grade thread with state of the art sewing machines.
- Darker tones selected on the premium Shaw carpet
- Two additional super plush pillows added to the opulent bedroom.
- Switched the glass hutch cabinet doors from frosted glass to rain glass.

- Wi-Fi Ranger router and outside antenna provide mobile connectivity. Centralize your network with this very secure router. Internet comes into the Wi-Fi Ranger via Wi-Fi or LTE or both sources. Connectivity is then distributed out to your Iphone or Android phone, Smart TV and computers.
- The powered theater seat is now standard on the D, P and W floorplans.
- Color-coordinated change made to the vinyl on the interior side of the front entry door.
- All A/C vents have been relocated to the center of the coach. This provides much more air movement when traveling down the road with the slide-out rooms in. Your four-legged traveling companions will love this new air climate product enhancement.
- Most switches in the coach will now be wireless Spyder switches.
- All background dash lighting will be white in color for an easy read while operating the coach.
- The newly designed kitchen window from Lippert has “easy open and close” operation. This feature allows for the window to be opened much wider for appreciated air flow into the kitchen.
- Go Power 3000-watt pure sine inverter, which replaces the Magnum inverter, produces an exact replica of AC power and are ideal for running any load within their wattage range.
- Go Power 380W solar panel system features two powerful 190W solar panels and will charge your battery up to 30 amps per hour. The system’s operation can be viewed on the Firefly touchscreen or on the phone application.
- Switched back to the 0192316 entry step from LCI used on the 2021 models because the amount of footing space on the horizontal portion of the step was greater than the one we used on the 2022 models.
- Newly shaped front cockpit mat has premium nylon yarn and non-slip backing.
- Eliminated the decorative driver and passenger map lights which were not effective for their intended use. The flashlight on your phone is much more effective as a map light.
- Added hidden storage behind fireplace on B and Z floorplans. Also comes with the optional fireplace selection on D and W floorplans.
- Kitchen ceiling vent now in linen wood frame to match the ceiling.
- The 100” 3-recliner sofa is now standard on the B and Z floorplans, while a 100” hide-a-bed sofa is now optional. The L-shaped sofa has been discontinued.
- No new floorplans and removed the 44F from the lineup.
